PROFILE

Software engineer who takes web and mobile products from idea to launch: founding engineer and product lead at a real estate startup, and solo builder of an app live on the App Store and Google Play. PhD researcher in Materials Chemistry with a machine learning background.

EXPERIENCE

Founding Engineer & Product Lead — May 2024 – Present
Propatis HQ · Lagos, Nigeria · Remote

- Lead a team of 5 as product manager: roadmap, Jira backlog, priorities and assigning tasks.
- Built the React Native mobile app (Expo) by myself, now in App Store and Google Play review, and build the web app with the team.
- Lead product design and the UI across web and mobile.
- Pitch and onboard clients one on one. ~200 daily visitors and 80+ sign-ups so far.
- Set up the growth stack: technical SEO, Google Analytics, paid campaigns on Google Ads, TikTok and LinkedIn, and content.

Solo Founder & Engineer — Mar 2026 – Present
Applyd Hub (Afoo Inc) · Lyon, France

- Designed, built and shipped a full-stack app to the App Store and Google Play (Expo, React Native, NativeWind, Express, PostgreSQL), with AI that tailors career documents.
- Started it as a tool for my own job search, then tested it with potential users before publishing. 30+ downloads so far.

Frontend Developer — Jul 2023 – Aug 2024
Neo64 GmbH · Darmstadt, Germany

- Built Flutter screens and the login, cart and checkout logic for B2B grocery apps Rungis Express (Germany and Austria) and Fideco (Switzerland), sharing one codebase across both markets. Both are live, with 2,000+ downloads across iOS and Android.
- Built a corporate site for Klierfeld GmbH (SvelteKit, Storyblok CMS) and dashboard features for the Wedflix streaming platform (Svelte, TypeScript, Tailwind).

Frontend Developer — Dec 2022 – May 2023
DigiSign Technologies Limited · Lagos, Nigeria

- Built reusable UI components for a document-signing dashboard with biometric verification (Next.js, TypeScript, Ant Design).
- Wrote unit tests with Jest and end-to-end tests with Playwright.

SELECTED PROJECTS

Lab Brain
Open source · lab-brain-demo.onrender.com
An open-source research workspace that links samples, characterization, analysis and conclusions for materials science. I use it several times a week to log and analyse my experiments. Separately, I contribute to OPTIMEO, our lab's Bayesian optimisation web app.
Next.js · Tailwind · TanStack Query · React Hook Form · Vitest · Playwright · Docker

Perry Luscious
Freelance · perryluscious.com
A website for a Lyon-based bakery to showcase its cakes and take customer orders, with a 3D cake designer built in Three.js. Around 80% of her orders, about 20 a month, now come through the website, with far less back and forth.
Next.js · Tailwind · Three.js · Sanity
